

Robotic Stretch Wrapper – Sfera

Stretch Wrapping...

The Pain!

Do you have problems stretch wrapping unstable, heavy or oversize loads?

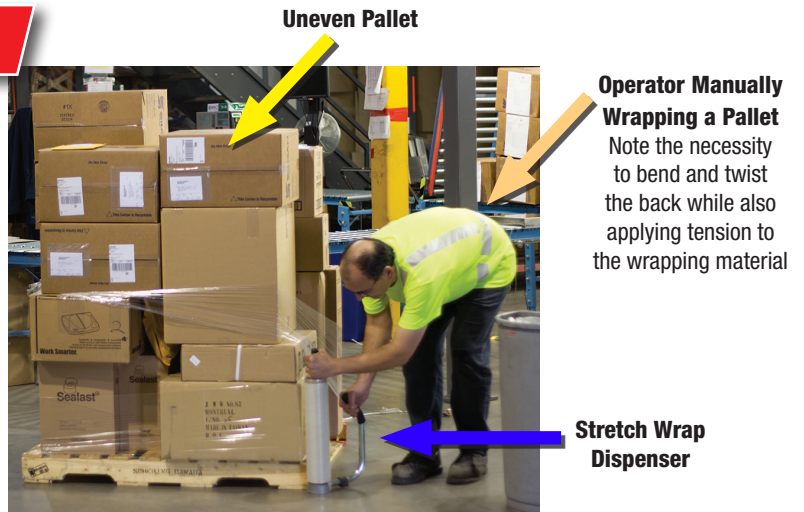

Is it difficult to move pallets through your crowded facility to the main stretch wrapping stations?

Do you want to be able to move your stretch wrapper when the job requires it but are unable to because the mast will not fit through a doorway or the machine is too heavy to move?

Are your workers suffering with tendonitis and back issues from bending and manually wrapping pallets?

Is space a premium in your facility?

Would you like to save 40 – 50% over hand wrapping and get the job done faster?

Stretch Wrapping...

The Solution!

If you answered yes to one or more of these questions, the Sfera Robotic Stretch Wrapper may be the perfect solution for your business.

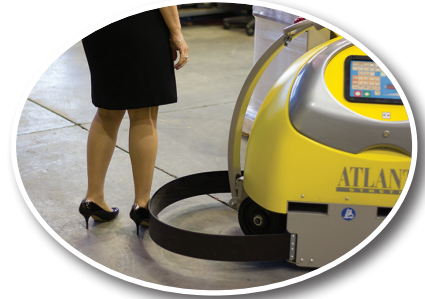

This unique self-propelled mobile stretch wrapper is ideal for unstable, heavy or oversized loads and for large multi operational warehouses where it can be taken from pallet to pallet.

Robotic Stretch Wrapper – Sfera

Store out of the way

Bumper with Kill Switch

Safe Film Carriage

Quick & Easy Film Loading

Wrap palletized loads in less than a minute... any size, shape or weight.

Easy-To-Use... 100 pre-set wrapping cycles plus the possibility of programming an unlimited number of options.

Adjustable pre-stretch with powered rollers... save 40–50% over hand wrapping.

Compact size... requires surprisingly little operating room and can be stored out of the way when not in use.

Easy-To-Move... On board controls allow the Sfera to be moved from place to place quickly. If longer trips are required there are special lifting holes on both sides of the machine for a Fork Truck to lift the unit – no dismantling is required and no mast to lower!

Unique film carriage design... allows the Sfera to operate in areas with low headroom and makes it possible to move through doorways without having to drop the mast.

One of the safest film carriages on the market... the powered film stretching rollers are completely encased during operation.

Powered by two rechargeable gel batteries... 150 to 180 wraps per charge.

Low maintenance... the machine's centre of gravity is kept low thus increasing the working life of the transport components.

Front safety bumper system... when contact is made the machine stops.

Let us find creative ways for you to own, lease or rent our outstanding line of stretch film equipment tailored to your budgetary priorities.
